

VINI-CLIP SYSTEM

Will not let you down

**STRONGEST LONGEST LASTING CLIP ON THE MARKET
SPECIALLY DEVELOPED FOR THE VITICULTURE
TRELLIS INDUSTRY, PROVIDING POSITIVE WIRE
TO POST FASTENING.**

- * Wires can be easily adjusted up and down the post as vines grow by unclipping and lifting wire to the next clip.
- * Clips are moulded from UV stablized polyethylene plastic capable of resisting temperature extremes and the harsh Australian climate.
- * By design the load is carried by the screw rather than the clip.
- * Screw pull out loads far exceed those of nails and staples, eliminating expensive tyre repairs.
- * Will not dislodge with harvesting and pruning operations saving on repeated replacement costs.
- * Self drilling screws easily driven in by cordless drill or air wrench, eliminating hamer shock to post (50 or 65mm class 4/12 gauge hex head screw used).
- * Available in both single and double clips for tension up or down.
- * Also available with nail fixing if preferred (nail gun best results)

NEW

Now available in nail fastening.
